Summary

Full-stack developer at AdonInfotech with experience building and maintaining serverless SaaS on AWS. Daily work with TypeScript, React, Next.js, AWS Lambda and MongoDB – including a React Native app shipped to App Store & Google Play and a TV client on the same shared backend. Background in Java development (Grit Academy) and earlier B2B sales / communication.

Experience

ADON Infotech AB , Malmö

Full-stack Software Developer

Mar 2024 – Present

Built and maintained a production fullstack SaaS platform in TypeScript monorepos – from Next.js frontend through serverless AWS Lambda APIs to MongoDB – with integrations including Stripe, OpenAI, Ably (WebSockets), Meta and Twilio. Developed and shipped a React Native mobile app to App Store and Google Play, and built a TV client connected to the same shared backend and surrounding systems. Daily work also covers CI/CD with GitHub Actions, infrastructure with SST, and collaborative delivery through code review and iterative releases.

Skills

Frontend

- TypeScript
- React
- Next.js
- Tailwind CSS
- TanStack Query
- global state handlers

Backend & Data

- Node.js
- MongoDB
- Express
- MySQL/MariaDB
